Art Unit: 1794

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 13 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

A “use” is non-statutory subject matter.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Picon et al (Biotechnology Letters).

Picon et al teach a process for producing cheese (e.g. Manchego) comprising the addition of phospholipase C in the amounts claimed to a conventional cheese making process (see entire document, especially the abstract and the Materials and Methods).

WO 00/54601 teaches conventional cheese processing in the presence of a phospholipase and is noted as of interest to the claimed invention.
